COMMENTS:

Dear Attorney Hays:

In accordance with our conversation this morning, on behalf of Delmar and Doris Batch I am asking that the Appeal of the Planning Commission's Decision set for tomorrow evening before the Lodi City Council be continued to the next City Council Meeting.

You indicated that the City Council would be considering the purchase of the Batch property tomorrow evening. We look forward to hearing of the result of the City Council's decision regarding that matter on Thursday. Should you have any questions or comments, please do not hesitate to call.

Very truly yours,

Fred Baker, Attorney for Delmar and Doris Batch

Original will follow.

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Public Hearing for Appeal of Planning Commission Decision on Century Meadows 4

MEETING DATE: June 21, 2000

PREPARED BY: Community Development Director

RECOMMENDED ACTION: Staff is recommending that the City Council deny an appeal that would have amended the Planning Commission's conditions of approval for Century Meadows IV, Tentative Subdivision Map No. 98S-003. Specifically, the appellant wants the City to reconsider its position that provisions for the proposed G-Basin (DeBenedetti Park) be addressed prior to any development occurring. Denial of the appeal will mean all of the conditions of approval for Century Meadows IV will remain intact.

BACKGROUND INFORMATION: The tentative subdivision map, approved by the Planning Commission in June of 1999 is located on the southwest corner of Century Boulevard and Mills Avenue. A proposed 29.85 acre subdivision containing 137 residential lots is permitted in the R-2, Single-Family zone. The minimum lot size in the R-2 zone is 5,000 square-feet with a lot width of at least 50 feet. Duplexes are allowed on corner lots provided the lot is a minimum of 6,000 square-feet with a lot width of 60 feet.

The average lot size in this proposed subdivision approximates 6,350 square-feet; however there are also 10 very large (10,000 square-feet or over) irregularly shaped cul-de-sac lots in the development.

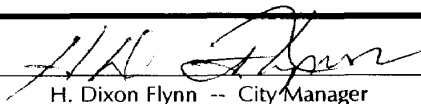

Planning Commission Action

On May 10, 2000, the Planning Commission denied the request from Delmar Batch to amend the conditions of approval for Century Meadows IV, a 49.05 acre development, located at 2360 West Century Boulevard. Specifically, the appellant was requesting that the Planning Commission delete or appropriately amend condition number 6.g.3, which reads as follows,

"The exact configuration of the G-Basin (DeBenedetti Park) expansion required by the City has not been determined at this time. An agreement needs to be negotiated between the owner and the City concerning the acquisition of the land needed to accommodate the G-Basin expansion before development is allowed to proceed."

ANALYSIS: **Appellant Concerns** - The project proponent states in his application that development plans are ready to be submitted to the City, but indicates that the provisions of condition 6.g.3 leaves the time uncertain if and when the City will stop the project. Staff's position is no different than it was at the time of approval; an agreement needs to be negotiated for the acquisition of land needed for G-Basin prior to development of Century Meadows IV.

APPROVED: _____

H. Dixon Flynn -- City Manager

Staff Response to Appellant Concerns

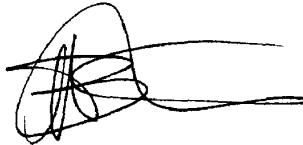

In order for the tentative map for Century Meadows IV to proceed as designed, all the conditions of approval need to remain intact. Therefore, City staff cannot recommend for the deletion or alteration of condition 6.g.3. Furthermore, the Public Works provided the following comment to the Commission for their consideration.

"The development plan and tentative map for this project were approved based on the assumption that the adjacent parcel to the west will be part of a basin/park complex and that no connecting streets will be required to accommodate adjacent development. If the negotiations between the owner and the City for acquisition of the adjacent parcel are unsuccessful, the current approved map is not acceptable. The condition is essential if the development is to proceed as currently designed, and should not be deleted or amended. If the City Council wishes to entertain an amendment, the developer should be required to submit a new development plan that incorporates the entire property."

Since the Planning Commission action, the property owner has submitted a Development Plan for the basin site. As it has just recently been submitted, it is too early to determine whether any issues exist with its design.

To reiterate, staff's position and recommendation to the City Council is that the City reject the appeal submitted by Delmar Batch and uphold the Planning Commission's decision on this matter.

FUNDING: There is no request for funding.

LODI CITY PLANNING COMMISSION
CARNEGIE FORUM
305 WEST PINE STREET
LODI, CALIFORNIA

WEDNESDAY

May 10, 2000

7:00 P.M.

The Planning Commission met and was called to order by Chairman Mattheis.

Commissioners Present: Steven Crabtree, Randall Heinitz, Jonathan McGladdery, John Schmidt, and Tim Mattheis

ROLL CALL

Commissioners Absent: John Borelli and Craig Rasmussen

Others Present: Konradt Bartlam, Community Development Director, Stephen Schwabauer, Deputy City Attorney, Wally Sandlin, City Engineer, and Lisa Wagner, Department Secretary.

The minutes of March 22, 2000 were approved as mailed. The minutes of April 12, 2000 were approved as mailed with Mattheis and Heinitz abstaining from the vote.

MINUTES OF
MARCH 22, 2000
AND APRIL 12,
2000

PUBLIC HEARINGS

The request of Delmar Batch to amend Tentative Subdivision Map conditions for Century Meadows IV, located at 2360 West Century Boulevard. This item was presented to the Commission by Community Development Director Bartlam. He began by reminding the Commission that they had approved a tentative map, which created the subdivision for Century Meadows IV, a 50-acre subdivision, about a year ago. He then presented an overhead showing how the balance of the project would be laid out should the City not purchase the property from the developer for its G-Basin expansion (DeBenedetti Park). If the City does not pursue the acquisition, the developer has plans to subdivide the G-Basin property. Staff claimed that if the City's acquisition of the property is unsuccessful, the current development plan was not acceptable. The reason for the proposed amendment was the time constraints put on the property with the existing condition that an agreement between the owner and City be decided before the development is allowed to proceed. The City and the developer cannot come to terms concerning the acquisition.

Commissioner Mattheis asked Community Development Director Bartlam to explain further why the newly configured section of the subdivision would not work if the City were not to acquire the property. Community Development Director Bartlam explained that lots 37-40 would have to be redesigned if a street were to go through at that location, thereby losing 1 to 2 lots. Community Development Director Bartlam further stated that the DeBennetti Park is part of the City's Master Storm Drain Program. The City uses the large park properties for drainage in storm conditions to detain water, allow percolation to occur, and slowly pump it out into the WID canal. A portion of the property will be used for storm drainage and the other portion will act as

a neighborhood park to serve the residents in the surrounding area. If the property is not built as a storm drainage basin, the existing basin will need to be 18 feet deeper, and the neighborhood would lose a park.

Commissioner Heinitz asked the where existing basin was located. Community Development Director Bartlam stated it was west of the property. He further noted that DeBennetti Park had been in the Park Master Plan for years as being developed as a major lighted athletic field. If the property were to develop as an 18-foot deep storm drainage basin, it would be a fenced hole in the ground. Commissioner Heinitz asked what the depths of other storm drainage parks were within the City. Steve Pechin, Baumbach & Piazza responded that the other basins throughout the City were 11 to 12 feet deep.

Commissioner Schmidt asked if the negotiations were still ongoing. Community Development Director Bartlam replied that the negotiations were ongoing and it was still the City's desire to purchase the property.

Commissioner Crabtree asked what size of storm drain was necessary to cover existing and proposed developments in the area. Community Development Director Bartlam replied that the basin would provide drainage for the southern quadrant of the City.

Commissioner Schmidt pointed out that if the condition is not satisfied regarding the City purchasing the property, then the tentative map could not be finalized with its current configuration.

Hearing Opened to the Public

Fred Baker, applicant representative. He requested that item 6.3.g be removed from the conditions of the tentative map to allow Unit 1 to move forward. He further stated that Unit 1 was configured to take in to consideration some large trees that are located within property. He is not opposed to park, which has been proposed for many years, and they had always expected that the City would want the park. In November 1999, the owner (Mr. Batch) entered into an agreement with Frontiers for the purchase of the property. In January 2000, Mr. Batch contacted the City to ask that negotiations be started right away. In order to proceed with the negotiations, the City requested that an appraisal be done to determine the value of the property. In April 2000 the City made an offer to purchase the property; however, it was 35% less than what a private party had offered. A new appraisal was requested at that time, and to date no appraisal has been received. They are willing to sell the City the property at fair market value.

Commissioner Mattheis asked why this matter was not handled sooner since the tentative map was approved in June 1999. Mr. Baker responded that in November 1999 they entered in to a contract with Frontiers and made contact with Public Works. He indicated that he would sell the property at fair market price to the City. When they met with Public Works Director Prima in December 1999, he stated that he was not able to negotiate at the time.

Commissioner Mattheis asked Mr. Baker why a revised tentative map had not been submitted and a new Development Plan redrawn. He further pointed out that if the City is not able to negotiate an agreement, then the subdivision would have to be rezoned and a new tentative map approved. Mr. Baker responded that he has always been “up front” with the City, he was not aware of a requirement for a new tentative map. He was only asked to prepare a development plan showing how that the park property would work. The lots are exactly the same size and the lot configurations would work.

Commissioner Schmidt asked if the first appraisal prepared was presented to Mr. Batch. Mr. Baker stated that he only received a letter along with a chart showing the comparable sales that were used by the appraiser. Commissioner Schmidt asked if Mr. Baker could wait for the second appraisal currently being prepared. Mr. Baker stated that if the City could give him a target date, he would be willing to wait. He further pointed out that Mr. Batch had already given the City a water well site and easements they needed for the surrounding property to develop.

Commissioner McGladdery asked for a history of the appraisals and how eminent domain would fit in to this property. Deputy City Attorney Schwabauer stated that the original offer was based on an appraisal done by a local appraiser. An offer was made and it was rejected. The City then asked for a second appraisal from a different appraiser, which is currently being done. He was hopefully that the City would receive the appraisal fairly soon. The City does have the authority to obtain property for park and storm drainage purposes through the eminent domain process.

Commissioner Heinitz asked Mr. Baker if he had solicited the other offer before or after rejecting the City’s offer. Mr. Baker responded that Frontier Development had an appraisal for the 29 acres prepared should the City not purchase the park. Earlier, the City had indicated that they were unsure whether they needed the park or not. He has other offers for the property, but with the City’s uncertainty of purchasing the property, the development of the subdivision has been put on hold. Mr. Baker would rather sell the property to the City. He asked that they be allowed to build Phase 1 now and settle the purchase of the other land at a later date.

Steve Pechin, Baumbach & Piazza, 323 W. Elm Street. He noted that the northeast portion of the property is known as Phase 1 with 71 single-family lots. He felt that the 71 lots could be built without any impact to the basin. The reason for the irregular configuration is due to trying to save trees. He is prepared to come in with another development plan and request a new tentative map for the northern and southerly parcels. He stated that other parks purchased by City were consistent in pricing.

Commissioner Heinitz asked whether the original tentative map that was approved showed the subdivision being developed in phases. Mr. Pechin stated that the tentative map was approved as one unit, but it could be also be modified into phases.

Commissioner Crabtree suggested that if the condition were removed from Phase 1, and retained as a condition for Phase 2, that might resolve the issue

Hearing Closed to the Public

Deputy City Attorney Schwabauer reviewed the Frontier's purchase contract and noted that it stated the purchase would not be settled until after April 1, 2000. He further noted that the Engineering Department had not received any improvement plans or final map that would indicate the developer was in a hurry to get the plans approved so that they could build this season.

Commissioner Crabtree felt that a reasonable compromise would be to remove the condition from the property identified as Phase 1 and retain the condition with respect to the remaining portion of property.

Commissioner Mattheis asked what would happen if only Phase 1 was to be built and the other phase never developed. Community Development Director Bartlam responded that the revised plan would not work as submitted. He wanted to deal with the problem directly. The City does not have the ability to revise the map unilaterally, therefore, we had no guarantee as to how the balance of the project would develop.

The Planning Commission on motion of Commissioner Schmidt, Heinritz second, denied the request to amend Tentative Subdivision Map conditions for Century Meadows IV, located at 2360 West Century Boulevard by the following vote:

AYES: Commissioners: Heinritz, Schmidt, and Mattheis
NOES: Commissioners: Crabtree and McGladdery
ABSENT: Commissioners: Borelli and Rasmussen
ABSTAIN: Commissioners

PLANNING MATTERS

The Planning Commission Effectiveness Survey was continued until the next meeting.

ACTIONS OF CITY COUNCIL

Community Development Director Bartlam informed the Commission that at the last City Council meeting the Council did adopt the Planning Commission's recommendation regarding the rezoning of properties located on the northeast section of town relative to the Mondavi Annexation. They also initiated the annexation with an application to the LAFCO.

ACTIONS OF THE SITE PLAN AND ARCHITECTURAL REVIEW COMMITTEE

Community Development Director Bartlam stated that Fire Station No. 4, located along Lower Sacramento Road, was approved. Also approved was the Downtown Parking Structure located on Sacramento Street, which will be a 3-level, 342 parking stall structure with retail space available on the first level.

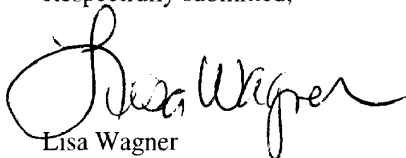

COMMENTS BY THE PUBLIC

Community Development Director Bartlam shared that City staff was currently reviewing a draft of the zoning ordinance. He then introduced the new City Engineer, Wally Sandlin and the new Deputy City Attorney, Stephen Schwabauer.

ADJOURNMENT

As there was no further business to be brought before the Planning Commission, Chairman Mattheis adjourned the session at 8:20 p.m.

Respectfully submitted,

Lisa Wagner
Secretary

MEMORANDUM, City of Lodi, Community Development Department

To: Planning Commission
From: Community Development Department
Date: May 10, 2000
Subject: Request of Delmar Batch to amend Tentative Subdivision Map conditions for Century Meadows IV, located at 2360 West Century Boulevard.

SUMMARY

The request from Delmar Batch is to amend the conditions of approval for Century Meadows IV, a 49.05 acre development, located at 2360 West Century Boulevard. Mr. Batch is requesting that the Planning Commission delete or appropriately amend condition number 6.g.3, which reads as follows,

“The exact configuration of the G-Basin expansion required by the City has not been determined at this time. An agreement needs to be negotiated between the owner and the City concerning the acquisition of the land needed to accommodate the G-Basin expansion before development is allowed to proceed.”

BACKGROUND

In June 1999, the Planning Commission approved a Tentative Map for Century Meadows IV. Century Meadows IV contains a 29.85 acre R-2 Single Family subdivision with 137 single family lots as well as 19.2 acres for the future DeBenedeti Basin/Park and neighborhood park. The minimum lot size in the R-2 zone is 5,000 square-feet with a lot width of at least 50 feet. Duplexes are allowed on corner lots provided the lot is a minimum of 6,000 square-feet with a lot width of 60 feet.

ANALYSIS

The project proponent states in his application that development plans are ready to be submitted to the City, but indicates that the provisions of condition 6.g.3 leaves the time uncertain if and when the City will stop the project. Staff's position is no different than it was at the time of approval; an agreement needs to be negotiated for the acquisition of land needed for G-Basin prior to development of any residential. In order for the tentative map for Century Meadows IV to proceed as designed, all the conditions of approval need to remain intact. Therefore, staff cannot recommend for the deletion or alteration of condition 6.g.3. Furthermore, the Public Works Department has the following comment in response to the request.

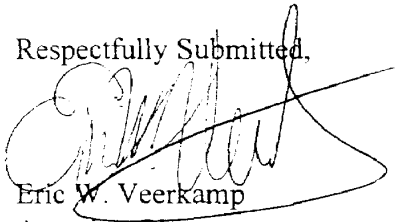

“The development plan and tentative map for this project were approved based on the assumption that the adjacent parcel to the west will be part of a basin/park complex and that no connecting streets will be required to accommodate adjacent development. If the negotiations between the owner and the City for acquisition of the adjacent parcel are unsuccessful, the current development plan is not acceptable. The condition is essential if the development is to

proceed as currently designed, and should not be deleted or amended. If the Commission wishes to entertain an amendment, the developer should be required to submit a new development plan that provides access for the entire property.”

RECOMMENDATION

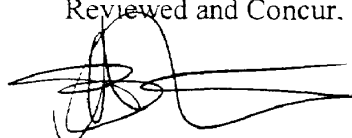

Staff recommends that the Planning Commission deny the request of Delmar Batch to amend Tentative Subdivision Map conditions for Century Meadows IV, located at 2360 West Century Boulevard.

Respectfully Submitted,

Eric W. Veerkamp
